**SUBJECT: ERIE COUNTY WATER AUTHORITY
CONTRACT W-24
SCOPE OF SERVICES UNDER ENGINEERING RETAINER**

Dear Mr. Stoll:

As requested, Wendel has prepared the following general scope of services for professional engineering services in support of the operation and maintenance of ECWA's water treatment and distribution facilities.

The work would be completed under the terms of Contract W-24. As conducted during the first two years of our agreement, specific project work will be determined by ECWA management.

Project work may include the following services:

1. Review the overall operation and maintenance of the Sturgeon Point and Van de Water Treatment Plants in an effort to recommend improvements to practices and procedures. Provide follow-up advice and guidance to Water Treatment Plant Staff, including managers and supervisors, to implement recommendations at each plant. Deliverables under this task will include memorandums and/or email as appropriate to document the work performed and recommendations developed under this task.
2. Complete review of remaining existing and preparation of new/revised Standard Operating Procedures (SOPs) for the plant. Work will include:
 - a. Complete review of remaining draft SOPs developed for the Van de Water Treatment Plant with ECWA staff.
 - b. Update photo documentation within the revised SOP documents.
 - c. Assist ECWA staff with the integration of the new SOPs for each plant into the SCADA system, including the insertion of hyperlinks within each document to

allow the operators to directly access related drawings, specifications, equipment cut sheets, and operation and maintenance (O&M) manuals.

Deliverables under this task will be three hard copies of the SOP Manual for each treatment plant (with electronic copies of the manuals and supporting files).

3. Assist ECWA with the editing of existing, and the creation of new, operation and maintenance O&M information in support of the ongoing City Works work order project. Secure and compile necessary O&M information including manuals and maintenance procedures specific to each piece of equipment at the treatment plants, pump stations and storage tanks.

The overall effort in developing a complete library of electronic O&M documents cannot be accurately estimated until an initial determination of the number of assets requiring an O&M reference is completed. Therefore the initial effort under this task will be as follows:

- a. Review the Excel database files provided by ECWA of assets for the Sturgeon Point and Van de Water Treatment Plants and identify assets in which O&M information is required.
- b. Review available ECWA O&M documentation for each plant and conduct a "gaps analysis" to identify missing O&M information.
- c. Compile currently available O&M documentation into pdf format (scan hard copies as required).
- d. Based on the existing O&M documentation collecting under c above, edit the Excel spreadsheets to add fields for the frequency of required O&M activities and the major equipment/materials needed to complete the O&M work. Add a link in the spreadsheet to existing manufacturer specific O&M manuals compiled under item c.

Subsequent work will include the securing of missing O&M information (as determined by the gaps analysis) for the Sturgeon Point and Van de Water Treatment Plants and incorporation of the information into the modified Excel database. The effort for this work will be determined following the completion of items a through d above.

O&M information for ECWA pump stations, storage tanks, and/or buildings/grounds may be completed in a similar manner if requested by ECWA.

Deliverables under this task will be a revised Excel spreadsheet for each plant as described above and scanned pdf copies of currently available O&M information.

4. Provide general consultation as-requested on on-going and future ECWA projects including those performed by ECWA staff and by outside consultants and/or contractors. Continue to provide services of a Principal Engineer at an average of 8 hours of time per week.

Deliverables under this task will include memorandums and/or email as appropriate to document the work performed and recommendations developed under this task.

5. Assist ECWA staff with projects related to water quality at the Sturgeon Point and Van de Water Treatment Plants and distribution system. Example projects may include:
 - a. raw water quality/intake improvement studies
 - b. coagulant/polymer optimization studies
 - c. filter loading rate studies (related to future backwash supply alternatives).
 - d. hydraulic analyses and modeling within the treatment plants
 - e. hydraulic analysis and modeling within the distribution system including assistance with preliminary sizing of new/replacement pump stations and transmission mains to support the ability to "redistribute" water within the system in response to specific geographic/customer demands.

Budget and deliverables for this task will be developed based on the specific work requested by ECWA

6. Prepare additional information to be used in further development of a long-term capital plan for the treatment plants, pump stations, large diameter transmission piping and storage facilities. Utilize/further develop the initial *ECWA Capital Improvements – Summary of Potential Projects and Costs* spreadsheet developed by Wendel and ECWA. Information to be prepared/considered may include:
 - a. detailed capital and maintenance costs (including Net Present Worth analysis)
 - b. equipment redundancy priorities including vulnerability to interruption of water production and/or delivery
 - c. schedule for capital improvements considering system demand, further customer growth, and useful life of current assets

Deliverables under this task will include appropriate revisions to the *ECWA Capital Improvements – Summary of Potential Projects and Costs* spreadsheet as well as memorandums and/or email as appropriate to document the work performed and recommendations developed under this task.

7. Leverage Wendel's partnerships with NYSDERDA and NYPA to secure grant funding to perform preliminary engineering work to identify opportunities for integrated capital and energy savings projects. Scope of work will focus on reductions in energy consumption, operating costs, and potential for outside grant/rebate funding to offset capital costs for needed asset renewal.

Deliverables under this task will include memorandums and/or email as appropriate to document the work performed and recommendations developed under this task.

8. Assist with ECWA staff with projects related to building, facilities and grounds including architectural, structural, mechanical, and electrical engineering design and construction services. Example projects may include:

- a. Facility renovations including roofing, doors/windows, HVAC, plumbing and fixtures, and site improvements
- b. Storage facilities for ECWA "consumables" (stone, fuel, salt, asphalt, etc.)
- c. Structural repairs/maintenance to buildings, tanks and basins,
- d. Electrical/lighting improvements in support of capital and maintenance projects

Budget and deliverables for this task will be developed based on the specific work requested by ECWA

FEE

Wendel proposes a budget allowance for completion of work assigned to the above tasks as per the attached budget worksheet.

Project personnel and direct expenses for additional work will be billed at the applicable classification/rates in accordance with the schedules provided in Amendment 1 of the original Professional Services Contract.

It has been our pleasure working with the Authority on the first two years of this Contract. We look forward to completing another successful year together.

Sincerely,

WENDEL
