Hydrant Meter Assembly Information

Location for Meter Assembly
Water to be Used For

No person, except as specifically authorized by the Authority, shall take water from any public fire hydrant for any use whatsoever other than for fire purposes. The use of public fire hydrants for washing streets, flushing sewers or other municipality needs will be done through a backflow-protected meter assembly issued to the municipality from the Erie County Water Authority Meter Shop. This unit will be used for all water used. This service is seasonal from April 15 through October 30. The unit will be returned to the Authority after October 30 and water, as registered on the meter, will be billed to the municipality at the meter rates set forth in said rate schedule. The municipality will be responsible for the proper care of the meter units and will be billed at cost for any damage repaired and for any lost or stolen units. The minimum charge will be for 50,000 gallons of water per meter and backflow preventer assembly at the current rate.

Application is hereby made to the Erie County Water Authority (hereinafter referred to as the Authority) for a backflow protected hydrant meter assembly. It is understood and agreed that the water shall be supplied and used only in accordance with the rules, regulations and rates of said Authority as now on file at the Authority's office at 350 Ellicott Square Building, Buffalo, NY 14203, and any modifications, alterations, or amendments thereof which may be made by the Authority from time to time.
