Subject: [EXTERNAL] Potable Water Usage of EC Food Manufacturers

Hello,

I am working with a food manufacturer on sustainability efforts and looking at their water usage. I am aware of the NYSDEC water withdrawal GIS dataset with information regarding withdrawals of 100,000 gallons or more per day of surface or groundwater.

I am wondering if there is any similar information available for potable water use within the ECWA service area. For instance, I am looking for data that I can utilize to compare how similar industry users compare to each other (i.e., how does Perry's Ice Cream potable water use compare to other food manufacturers?).

Please let me know if this information is available.

Many thanks!
Holly
