Description of Work

We excavated at the water box in order the shut the water off due to it being inaccessible. We then excavated roughly 15' from the foundation out to the road. After turning the water on and off there were no signs of a water line break. We did further investigating by doing a dye test, chlorine test, etc. we found a shut off valve for what appeared to be an irrigation system. Due to it not being properly winterized, shutting the valve off stopped the flow of water into the sump crock as well as water traveling through the meter. Discussions were made on our behalf with Erie county water authority regarding their diagnosis and the excavation. They admitted to diagnosing the issue incorrectly, resulting in a misleading demand to have a plumber replace the water service. Due to the circumstances, they will be in contact with David. Per ECWA, David will be responsible for paying us the due amount, and they will reimburse the amount. Waiting on David and ECWA to be in contact with each other before any payment is made.
